SPRING CONVOCATION

The University's 52nd Spring Convocation, as colorful as ever, although a little more subdued than some, was held late in May. Leading the procession down the long aisle separating a sea of standing graduands are Dr. Walter H. Johns, University President, front centre, and Lieutenant-Governor J. Percy Page. During the course of the afternoon some 985 young men and women moved across the Jubilee Auditorium stage to be admitted to Convocation by the President in the absence of Chancellor L. Y. Cairns.

HONORARY DEGREES CONFERRED

Chief Justice S. Bruce Smith, Alberta Supreme Court, left, and Freeman K. Stewart, Executive Secretary of the Canadian Education Association, right, received honorary Doctor of Laws degrees at the University of Alberta's 52nd annual Spring Convocation. The degrees were conferred by University President Dr. Walter H. Johns, centre, in the absence of ailing Chancellor Judge L. Y. Cairns.

Excerpts from President's Report

Spring Convocation

May, 1962

"PLANS are nearing completion for the Student Residence complex on the Edmonton campus. There has been a delay in the preparation of mechanical drawings, but we hope that the tenders can be called by June 15th. This may mean that the residences will not be ready for occupancy by September, 1963, but we understand that every effort will be made to meet this deadline. Plans for residences on the Calgary campus will be started shortly. Plans are also well advanced for the Bookstore and Terminal Building and the Library on the Calgary campus and for the new Research and Graduate Library on the Edmonton campus. Other buildings on which we hope a start may be made this year include the Social Science Building, the Structural Engineering Building and the enlarged Van de Graaff Building on the Edmonton campus, and the Engineering Building and the Arts Building on the Calgary campus . . .

. . . Matriculation scholarships and loans went to 299 first year students in an amount of close to \$80,000. Grants and loans were made in all to 2,177 students with \$273,502.00 being awarded in outright grants and \$550,000.00 in loans.

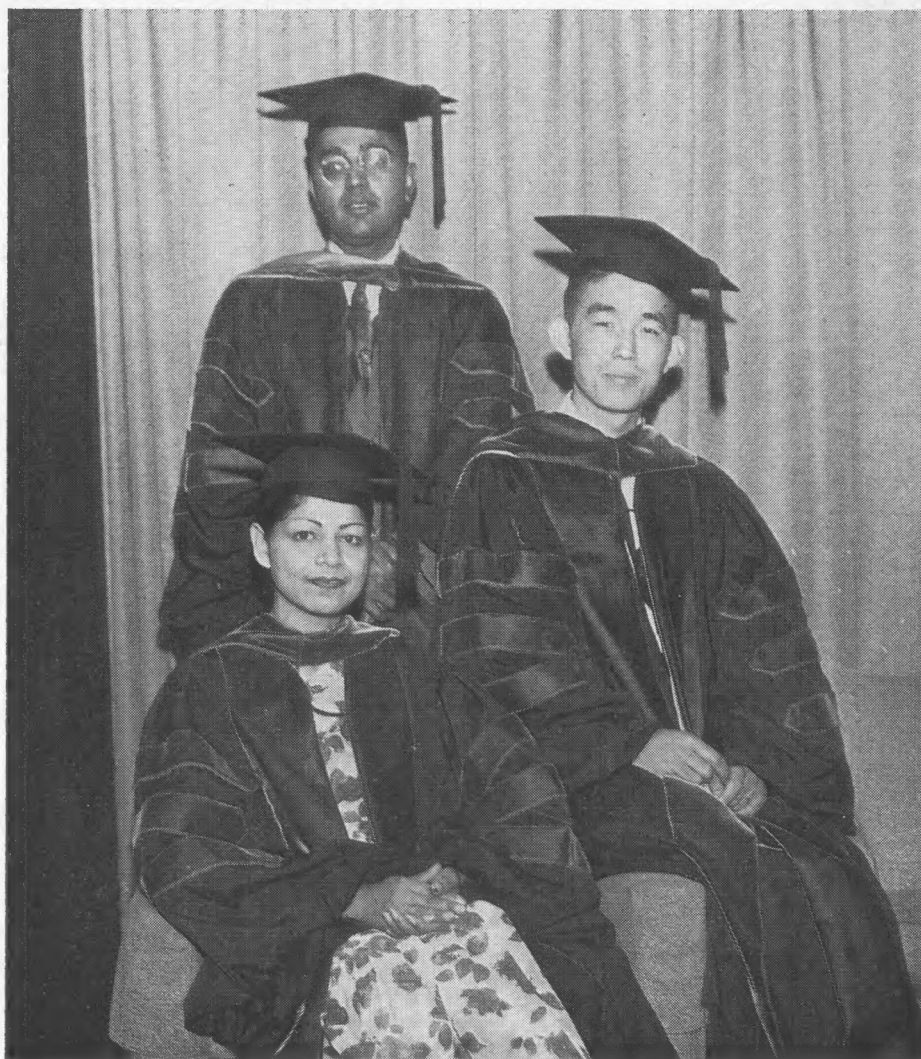

Research is becoming an increasingly important part of the University's activity and over 8% of the University's income goes directly for this purpose, amounting to nearly one million in 1960-61. These figures are rising each year and will, no doubt, continue to rise as more and more emphasis is placed on graduate education and research.

The academic life of the University continues to change and develop constantly in keeping with the changing needs of society for higher education and professional training. The most important administrative development this year has been the decision to divide the Faculty of Arts and Science on the Edmonton campus into two Faculties, with Dean D. E. Smith retaining responsibility for the Faculty of Arts and Dr. H. S. Armstrong, Dean of the Faculty of Arts and Science at McMaster Uni-

versity, assuming the position of Dean of the Faculty of Science.

Approval has been given to a new program leading to Bachelor of Arts in Recreational Activities to be administered by the School of Physical Education and to a new honors program in genetics, and a new pattern in food science in the Faculty of Agriculture. Substantial re-organization has taken place in the curricula of the Faculties of Agriculture, Dentistry, Engineering, and Education. In the Faculty of Education, the former junior elementary program of one year duration has been discontinued and the minimum program for a teaching certificate will hereafter be two years in length. In keeping with the plans for increased programs for technical training in Edmonton and throughout the Province, the Board has established a new division of vocational and industrial education in the Faculty of Education. The undergraduate program leading to the degree of Bachelor of Science in petroleum engineering is to be discontinued, but two undergraduate courses in this field will still be offered as options and the graduate program will be carried on as before.

The changes and additions to the offerings of individual courses continue at a high level. Nearly every department in the University (and these are now about 60 in number) has made some change, but most have occurred in Biochemistry, Geography, Geology, History, Modern Languages, Music and Sociology. Continued evidence of the University's growing maturity is found in the roster of departments which have been given authority to provide instruction at the doctorate level. With the additions made this year, the following departments may offer such programs: Animal Science, Dairy Science, Entomology, Genetics, Plant Science, and Soil Science in the Faculty of Agriculture; Botany, Chemistry, English, Geology, History, Mathematics, Philosophy, Physics, Psychology, Political Economy, and Zoology in the Faculty of Arts and

FROM FAR EAST FOR Ph.D.'s

Scholars from near and as far as the Far East, gained degrees from the University of Alberta at Convocation in the Jubilee Auditorium on May 24th. In the school of graduate studies, the degree of Doctor of Philosophy was conferred on research scholars from India and Japan. Harwant Singh of Indore, India, standing, and Ganapathy Ram Chandra, New Delhi, obtained doctorates in biochemistry. Yasuo Azuma of Tokyo gained his doctorate in microbiology.

Science; Educational Administration, Educational Foundations, Educational Psychology and Secondary Education in the Faculty of Education; Chemical and Petroleum Engineering, Civil Engineering (Structures only), Mechanical Engineering, and Metallurgical Engineering in that Faculty; Biochemistry, Pharmacology, and Physiology in the Faculty of Medicine; and Pharmacy in that Faculty. There are at the present time 66 candidates for the Ph.D. registered in Chemistry, 19 in Physics, and 12 in Geology, as well as

many others in the various Departments and Divisions mentioned above. In addition there are a number of Post-Doctoral Fellows studying on the campus, some of whom are supported by grants from the University, but the majority by such agencies as the National Research Council. The first and only Post-Doctoral Fellow to take advanced work in a college of Pharmacy in Canada has been appointed to the University of Alberta Faculty of Pharmacy on a fellowship from the National Research Council. . . . "

The New Status of Education

By Freeman K. Stewart
Executive Secretary, Canadian Education Association

IT has been a particular pleasure for me to have worked rather closely, these past eleven years, with your great University. Universities are by nature conservative institutions. It was natural, therefore, that some of us considered very carefully where we might best seek university co-operation in embarking on a new program in Canadian education and it was by design that we turned for help to the University of Alberta. After appropriate discussions with your President, the Dean of the Faculty of Education, and his colleagues, we devised a program which, with your strong support and gradual assumption of responsibility for it, now provides educational opportunities unique in the British Commonwealth. I congratulate you at this University on your readiness to welcome new ideas and on your persistence and ingenuity in developing those that seem worthwhile.

My association with your Faculty of Education has made me a frequent visitor to your campus. While I have always been received most graciously, I came of necessity as a stranger, from now on, I feel I may come as one of yourselves, having concern for your problems and taking pride in your achievements.

On occasions such as this, one is expected to give an address which should have relevance to the circumstances, be mercifully brief, and contain at least some elements of wisdom. I can meet the first two criteria without much hesitation, but the attempt to evoke wisdom brings to my mind some observations on the subject by J. K. Galbraith in "The Affluent Society". "In general the articulation of the conventional wisdom", Mr. Galbraith writes, "is a prerogative of academic, public, or business position . . . It is one of the rewards of high academic rank . . . Before assuming office", Mr. Galbraith continued, the high public official, "ordinarily commands little at-

tention. But on taking up his position he is immediately assumed to be gifted with deep insights."

I suppose that the recipient of an honorary degree may be expected to be gifted, at least temporarily, with some wisdom, conventional or otherwise, and I shall therefore venture to make a few remarks intended to be of that nature. Since we are all concerned with education, let me draw your attention to some aspects of it related to my own work.

Within the past decade education has come to occupy a new importance in the Western world, partly because events elsewhere have focused attention on its relation to political and economic development. As Barbara Ward has pointed out, in **The Rich Nations and The Poor Nations**, "recent studies suggest that between sixty and fifty per cent of the gains in productivity made in the West in the last half-century spring from better trained minds, from more research, and more systematic use of the economy's brain power."

The Russians, looked on as a backward people who were unable to produce a respectable automobile and whose American-gift tractors rusted in the fields, startled the world by putting the first satellite into orbit five years ago. Their leaders not only said education was important, but also, rather alarmingly, acted as if they believed it. In what looked to many outsiders almost as a reflex action, the United States instituted a program of federal aid to education, under the suggestive title of The National Defence Education Act.

Thus education has acquired a new status in our time: it has become, in some major countries, an instrument of national policy, and with good reason. In the under-developed countries of the world, edu-

cation is regarded as the best means by which they can achieve better economic conditions and maintain their independence. UNESCO stresses in a new publication, entitled "Africa Calls", that "Education is everywhere regarded as the key to progress, the most potent instrument for equipping the people at large for their new responsibilities, an essential factor in economic and social development . . ."

The need to help these newly developing countries presents one of the great challenges of our present day. In Tropical Africa, for instance, which has a population of 170 million, the estimated illiteracy rate is 85%. In India and South-East Asia nearly half the children are unable to attend any school at all. This is an ominous situation in countries which have achieved, or are about to achieve, their political independence in a technological, jet-propelled, atomic-oriented world.

The Canadian Government, as part of the Colombo Plan and the Commonwealth Education Program, is carrying out an extensive program of External Aid in education to such countries. It offers wide opportunities to young people at university, to school teachers, and to university faculties, to be of national service.

However, I do not intend to relate to you the details of this external aid program. I am concerned rather to emphasize certain circumstances that seem to distinguish our present period from any previous period. I do not propose to tell you, as is customary at graduation, that you are faced with the most challenging time in all history. Those of us who graduated in the depression of the thirties, whether in eastern or western Canada, and who went through World War II, also had our challenges.

What distinguishes the present period is the immense wealth of a

THE NEW TRAIL is proud to reproduce a provocative address to Convocation delivered by Freeman K. Stewart who received an Honorary Doctor of Laws Degree, HONORIS CAUSA.

few countries and the appalling poverty of all the other countries. The people in poorer countries are well aware of this disparity. At the same time the ideal of equality, not only of individuals, but also of nations, has begun to receive wide acceptance. In consequence the poorer countries at international conferences frequently speak of the "obligation" of the richer countries to help them. It may well be that the concept of the welfare state, which developed in the first half of this century, may extend in the second half to some concept of a welfare world.

Whether or not developments extend that far, one of the most important phenomena of the rest of this century will be the provision of economic and educational aid to the less developed countries. It may be difficult to adjust to the idea of international philanthropy, but call it a challenge, of a fact of life, like the depression or the last world war, it is one with which your generation, and perhaps several generations, will, in my view, have to come to terms. We are, as someone has said in another context, burdened with the honour and honoured with the burden.

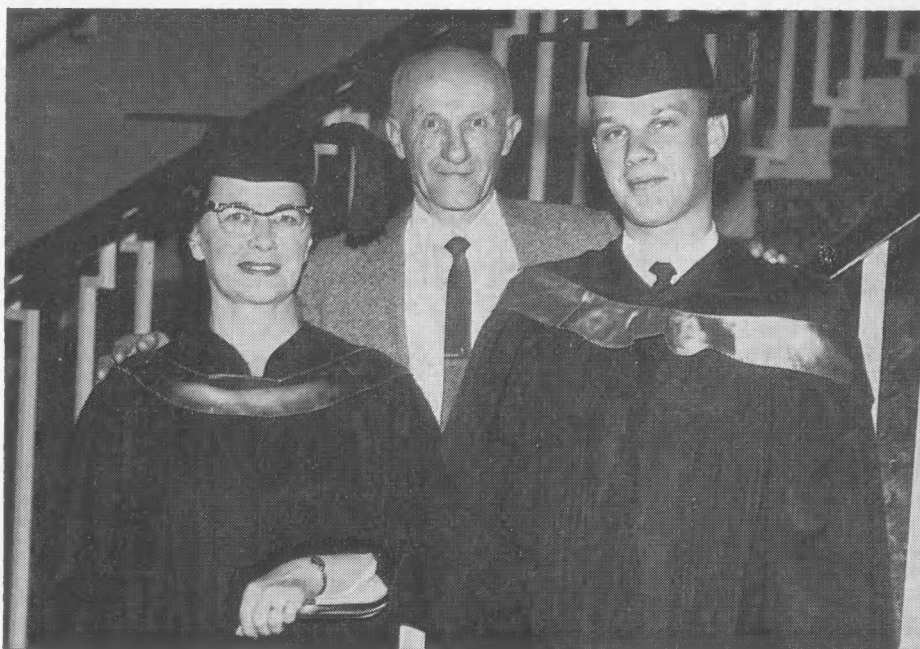

We in the North Atlantic Community are the inheritors, nationally if not, unfortunately, individually, of vast wealth, compared with all other parts of the world. We have financial and educational capital which we have come to take for granted as our right. Nearly 100 years ago Abraham Lincoln said the United States "cannot endure permanently, half slave and half free". While many in good faith then disagreed, events proved that Lincoln was right. Revolutions and related wars make it clear that the world will not endure permanently with a majority of its people hungry, sick, impoverished, and ignorant.

I am not proposing that Canada by itself, or a few individuals in Canada, can serve the underdeveloped countries, but since we are a wealthy country, and fortunate in many other ways, much is expected from us, especially from the universities and from university graduates. From

FAMILY PRIDE

Among graduates of the University of Alberta, May 24th, Mrs. Lila Fahlman, in cap and gown, received her Bachelor of Education degree. Four years ago her husband, A. E. Fahlman and three children, Cameron, left, Pamela and Tamara, held a family council and decided that their mother should fulfil a dream to obtain a university degree.

WELL EDUCATED FAMILY

Mrs. Pearl Allen and son, Don of Holden, both received degrees at University of Alberta graduation exercises. Mrs. Allen completed her Bachelor of Education degree at summer schools, while son Don, right, graduated in commerce. His dad, Don senior, background, was a member of the first commerce class to graduate from the University in 1923.

you is expected leadership, for you are principal actors, not "attendant lords" who will do "to swell a progress, start a scene or two".

And if leadership is expected from you and from Canada, in what ways can we best give such leadership? For some years now my organization, in conjunction with your University in particular, but also with professors, teachers, and education officials from other provinces, has studied ways to identify and give professional training to people who will give leadership in education. As a result of these studies, I have gained the impression that leadership arises from a variety of qualities, and different combinations may be effective in different situations and with different groups. One characteristic, however, has seemed rather constant, at least to me, and this is that a person can do a great deal of good if he is not seeking credit for himself. In other words, the leader is not always the recognized hero. He may be the man who listens quietly and puts forward a solution which is often adopted as theirs by those with louder voices; he may be a person who gives steady support and advice to someone who is perhaps at times erratic, but who has other qualities or a position that attracts and holds followers. Often he may be a person who wants only to give rather than to receive. In fact, it is my observation that with rare exceptions, a leader may at times be Everyman and that, I think, is the basic strength of our democracy and our way of life.

From this experience there is perhaps a lesson in the leadership our country can give internationally, though my comments are naturally directed to aid in education. To extend somewhat a point made by Barbara Ward, we are sensationally richer, more comfortable, and better educated than the people in the developing countries, but we are not demonstrably happier, nor wiser. In consequence, whether we go to provide help in their countries, as some of us have, or they come to study in ours, as many of them do, we have something to learn as well as to

ALUMNI CONVOCATION DINNER

A particularly pleasant occasion was the traditional Alumni sponsored Convocation Dinner held the night before Spring Convocation in the lower room of the Jubilee Auditorium. Some 600 graduands, their parents and friends enjoyed a convivial evening studded with interesting toasts and graced by several interesting personalities. Guest speaker was Senator Donald Cameron, Director, Banff School of Fine Arts, who highlighted the evening with a stimulating address; entitled, "Educating Our Human Resources—A National Imperative."

teach. Our money and knowledge and techniques will aid them, but not necessarily our politics and culture; to the extent they find the latter valuable, they may adopt them or at least adapt them. The zeal to convert others to our way of thinking belongs to earlier times; the spirit of these new times should be evident in a readiness to help the less fortunate, both at home and abroad, not only for their sake, but also for our own, because morally we have come to feel it is the right thing to do. If we think we are in some way better than these people, or if we merely want their political support in a divided world, we shall be quickly detected and keenly resented.

It is in this moral struggle, where political doctrines and tangible goods are only instruments, and principles are the ends, that we stand to win or

lose the confidence and friendship of the developing countries. In this kind of struggle, each of us has a part to play; there is a great temptation nationally to look on the many new developing countries, even as we sometimes look on our own associates, as **means** rather than as **ends**. We ought to help them as we ought to help anyone, not to win converts, but because it is good for us, and because it is the right thing for us to do. As T. S. Eliot once put it,

"The last temptation is the greatest treason:

To do the right deed for the wrong reason."

In this task the decision is never easy and perhaps not always clear, but it is one that we are called upon to make, if we wish to live happily with others, and with ourselves.

WHEN . . .

a public-spirited citizen undertakes the responsibility of helping to govern a university, he should recognize that his duties transcend the mere passing on of administrative actions. He makes basic policy decisions; he guides the entire program of the university; he becomes intimately involved in whatever projects are necessary to make that program successful. The trustee of a dynamic university has a working, participating role to play. The welfare of the institution depends on his understanding and support, his leadership and counsel. A university led by a group of men who meet this challenge is a fortunate one indeed.

Municipal Support

Universities derive less than one per cent of their operating income and about one per cent of their capital funds from municipal governments.

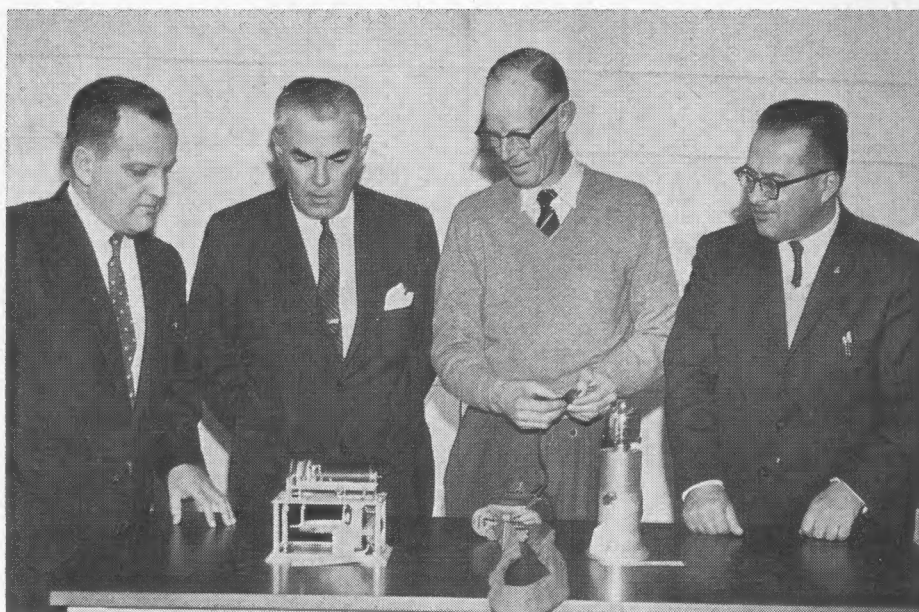

At most, half a dozen universities and colleges share the revenue of the cities in which they are located, the most common pattern being the yield of one mill in the tax rate. Municipalities bear a large part of the burden of financing elementary and secondary schools so it is not surprising that they show little inclination to add any appreciable part of the load of higher education.

There is but one municipal college in Canada—Lethbridge Junior College in Lethbridge, Alberta.

—C.U.F. report

Foreign students accounted for about 6.2% of total enrolment at universities in 1960-61 and numbered an estimated 7,100. If they continue to account for 6% of enrolment there will be close to 19,000 foreign students in 1970-71.

C.U.F.

SCIENTIFIC COLLECTION

An extensive scientific collection belonging to the late Roman R. Gonsett, sometimes referred to as the Ukrainian Edison, was donated recently to the University. Now housed in a display case on the fourth floor of the Engineering Building addition, the scientific items range through the fields of radar, telephonics and electronics.

Shown examining the collection are, left, Alex G. Markle, Alumni Secretary; President Walter H. Johns; Dr. J. W. Porteous, Department of Electrical Engineering; and Prof. Orest Starchuk, Department of Modern Languages.

Dr. W. G. Hardy, distinguished classicist, author and playwright, will be awarded the University of Alberta's 1962 National Award in Letters at Banff this summer, it was announced recently by the University Board of Governors.

The U. of A. National Awards were instituted in 1951 for the purpose of recognizing the services of persons who had made important contributions in the fields of music, letters, and painting and related arts over a long period of years.

The author of a wide selection of novels, radio plays and talks, and a teacher of outstanding note, Dr. Hardy first joined the department of classics staff at the University in 1920. In 1938 he became head of the department and over the intervening years his extra-curricular interests have been legion.

In the field of sports he served as President of both the Canadian Amateur Association and the International Ice Hockey Association. In recognition of his wide contributions to the field of literary effort Dr. Hardy was elected President of the Canadian Authors' Association in 1950 and was made a Life Fellow of the International Institute of Arts and Letters in 1961.

This is the first time in the eleven-year history of the University's National Awards that the honor has been placed with one of its own. Other recipients of the Award in Letters have been Mazo De La Roche, E. J. Pratt, Marius Barbeau, B. K. Sandwell, Lorne Pierce, Roderick Haig-Brown, Donald Grant Creighton, Francis Reginald Scott and Hugh MacLennan.

TOTAL ALUMNI AID PASSES \$60,000 MARK

Assistance in the form of three, \$1,000.00 intersession postgraduate bursaries were approved by the General Alumni Association of the University of Alberta at its 23rd annual meeting on the campus this Spring.

This brings to a total of four the number of substantial scholarships awarded by the Association in the past two years to graduate students in the fields of the humanities and social sciences who experience a critical period in the lull between academic sessions.

During the past three years the Alumni Association has raised \$60,757 through the Alumni Fund. The Fund is made up of annual contributions from University graduates from across Canada and abroad. All of this money has been returned to the University in the form of direct and indirect assistance. Valuable research microfilm of the **New York Times**, the only collection of its kind at any university campus in Canada, was obtained at considerable cost and is housed for graduate and undergraduate work in the Rutherford Library. In 1959 a pledge of \$100,000 was made by the Alumni Association to aid in the construction of new University Residences on the Edmonton campus. Last year \$5,000 worth of books were purchased from Alumni Fund contributions to initiate an Institute of South American Studies at the University of Alberta, Calgary.

The number of young people of university age (18 to 24 years) in Canada is expected to increase by 44% between 1960 and 1970. C.U.F.

Full-time university enrolment of men will rise from 86,500 in 1960-61 to 227,000 in 1970-71. Enrolment of women: from 27,500 in 1960-61 to 85,000 in 1970-71. Total enrolment may nearly triple—from 114,000 in 1960-61 to 312,000 in 1970-71.

C.U.F.

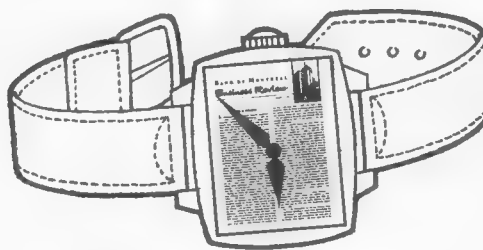

Graduate students numbered 6,600 (5.8% of the total) in 1960-61. They may number 25,000 (8% of the total) in 1970-71.

"DOKALIK" PASSES

Dr. William Hardy Alexander, professor of classics and first academic appointee to the wilderness campus in 1908, has passed away.

Better known to many by his pen name "Dokalik" his memory will ever remain part of U. of A. tradition for it was he that selected the motto "Quaecumque Vera" and gave to the institution its Latin Grace. The two ribbons that Mrs. Alexander selected in those early days as most resembling the gold of the poplars and the green of the spruce trees, now the University colors, remain a keepsake of the Lawrence (Larry) Alexander household.

Dr. Alexander was educated in the public schools of Ontario from which he passed with highest matriculation honors in classics and mathematics. Following his graduation from the University of Toronto in 1899 he served as Latin tutor at the University of California where he obtained his M.A. in 1900. Subsequently he earned a Ph.D. degree from Berkeley.

It was while he was serving as professor of Latin and comparative philology at the University of Western Ontario that he received a call from the first President of the University of Alberta, Dr. H. M. Tory, to join the academic staff here as professor of classics in 1908. In 1936 he became Dean of the Faculty of Arts and Science, a position which he held until 1938. In 1933 at the time the University celebrated its silver anniversary Dr. Alexander was awarded an honorary LL.D. degree. In 1936 he was named a Fellow of the Royal Society of Canada and was national lecturer for the Society in 1950.

In 1938 Dr. Alexander was called to Berkeley as professor of Latin and named chairman of the department of classics at the University of California in 1942, a position which he retained until his retirement in 1948. That year he was named one of the literary editors for publications of the University of California Press, a position which he held until 1958 when he returned to Edmonton to participate in the celebration of the University's 50th anniversary.

Always interested in the growth of the City of Edmonton, Dr. Alexander served on the public school board from 1920 to 1924 and along with the late Prof. E. K. Broadus shared the honor of pioneering the Belgravia district in 1910.

As a writer Dr. Alexander contributed some 125 articles on a wide variety of subjects mostly to the classical journals of England, the United States and Canada. At the time of his death he was about to have published a complete translation of the writings of Seneca.

SANDIN HONOURED

Dr. Reuben B. Sandin, Professor of Chemistry and a legend on the campus, has been chosen as the first Canadian to receive the Outstanding College Chemistry Teacher Award sponsored by the Manufacturing Chemists' Association, Washington, D.C.

Professor Sandin's distinguished career in teaching and research at the University of Alberta stretches over forty years. During that time some 200 of his students have taken the Ph.D. degree in chemistry, and many of these students are now recognized leaders in the chemical profession.

After receiving his early education near Wetaskiwin, Alberta, he studied at the University of Alberta, receiving the B.A. in chemistry with high distinction at the age of 19. In 1924 he received his Ph.D. degree from the University of Chicago and was appointed to the staff at the University of Alberta.

Widely recognized as an outstanding teacher and research worker, Professor Sandin was awarded a Rockefeller Foundation Fellowship at Harvard University in 1939; in 1958, he was elected a Fellow of the Chemical Institute of Canada. That organization also honored him with a special citation in organic chemistry in 1960, and by choosing him for its Chemical Education Award in 1962.

Professor Sandin and his students have published over sixty research papers in organic chemistry. He is especially well-known for his contributions to the synthesis of chemical agents for the treatment of cancer.

THE PACIFIC REPORTER

A set of the PACIFIC REPORTER covering all American law cases to date in the Pacific area was presented recently to the University by the law class of '51. This noteworthy addition to the law library was arranged for and purchased by members of the class who last year celebrated their tenth anniversary.

THE GRADUATE RESEARCH LIBRARY

The new Research Library Building on the Edmonton campus will be located immediately west of the Arts Building. The first portion will be constructed between the North and South Laboratories and with their future demolition identical wings will be added to the Library to the north and south as space requirements demand. The main doors will face west. The main floor will house all administrative library departments including circulation, union catalogue, bibliography, general order office, cataloging, reference and periodical departments. The second, third, fourth and fifth floors will contain all general book stacks and reading areas including faculty cubicles, offices for the chief librarian, assistant librarian and smoking areas. In the basement there will be provision for staff lockers and washrooms, staff and student lunchrooms, document stacks, maps, binding, periodical storage, audio-visual, microfilm storage, archives, photo lab, and rare books.

NEW LIBRARY ON CALGARY CAMPUS

The new Library Building on the Calgary campus will be located next to the Science and Engineering, and Arts and Education Buildings with the main entrance facing southeast. Like the Edmonton Research Library a centre portion will be constructed first and subsequent wings will be added on either side as future space requirements demand them.

The main floor will accommodate all administrative library departments including circulation, union catalogue, bibliography, processing, periodicals, reference, and reserve readings rooms. The basement floor will house staff locker and washrooms, student washrooms and student lunchroom, and the remaining space will be divided temporarily to provide urgently needed classrooms. General book stack and reading areas will be located on the second and third floors. On the fourth floor approximately 60 faculty offices will be accommodated along with faculty and staff lounges with kitchen facilities and a computing centre.

General Alumni Association

A full day of intense activity centered about the 23rd annual meeting of the General Alumni Council held this spring on the University of Alberta campus, Edmonton.

Some 25 delegates representing the resident alumni executive and alumni units across Canada were in attendance for the day-long proceedings which dealt with G.A.A. programming and the allotment of donations received through the Alumni Fund 1961-62.

At a noon luncheon in the Cafeteria councillors were the guests of the Board of Governors of the University, at which time Dr. Walter H. Johns, President of the University, spoke on the progress and problems of the institution. Several presentations were made. The Burgess Alumni Trophy for the best all-round alumni branch in 1961-62 was presented by the donor, Bruce Burgess '48, to Michael Bevan '45, President

of the Toronto branch. A special merit award was presented by President H. G. Thomson to the Vancouver branch of the Alumni Association, represented by Art Thompson '37, for continuing activity meetings.

After enjoying a successful year it was a particularly pleasant assignment for the general council to approve the recommendations of the Alumni Fund Trustees committee. They were that \$3,000 be assigned in three \$1,000 amounts as intersession assistance grants to aid post-graduate students in the Faculty of Graduate Studies engaged during the summer in advance work in the fields of education, the humanities, and social sciences, and that the balance of \$255.91 be held as a 1961-62 residue account to be expended at the discretion of the 1962-63 resident alumni executive for any worthy purpose of importance to the University and its student community.

PEACE RIVER PIONEER DEEDS WORLDLY GOODS TO UNIVERSITY

An 86-year-old bachelor and homesteader of the Peace River district, Charlie Plavin, recently signed over \$29,000 in cash and willed the remainder of his estate to the University of Alberta.

A lover of "good music" and a firm believer in education, Mr. Plavin gave the \$29,000 to the University to found a music scholarship and provide bursaries for first year University students.

The music scholarship to be called the "Peace River Pioneer Memorial Scholarship" will provide an annual total of \$300 to music students who have indicated they would be interested in teaching music in rural areas.

The remainder of the income from the capital invested will be used for bursaries to students entering first year university from the area north of High Prairie.

Mr. Plavin was born in Latvia in 1875 and came to the North Star district, about 50 miles north of Peace River, in 1916.

His present home and original homestead in the district is now a landmark. A mile south of North Star on the north side of Highway 35, a row of spruce trees and two cement and stone gateposts indicate the entrance to the old homestead.

Mr. Plavin learned to play several musical instruments, including the cello and the violin, in the Old Country and used to teach violin to children in the Peace River district schools many years ago.

ALUMNI RECEPTION

Following the 23rd annual meeting of the General Alumni Association a reception and dinner was held at the home of President and Mrs. Walter H. Johns, No. 1 University campus. Seen visiting in the lower lounge of the President's new home are, left, standing, Art Thompson '37, Vancouver; Dr. Don R. Stanley '40, newly elected President of the G.A.A.; seated, left, Mrs. Stanley '58; Mrs. Walter Johns; Michael Bevan '45, Toronto; and President Johns.

A UNIVERSITY TODAY . . .

needs a great deal of money. How much it can acquire and how well it manages its financial affairs determine to a large extent the degree of quality it can maintain. Ralph Waldo Emerson said that "money, which represents the prose of life, and which is hardly spoken of in parlors without an apology, is, in its effects and laws, as beautiful as roses." Times have changed since then; parlors today are suitable places for mentioning money, and it is generally agreed that, in higher education, without Emerson's prose of life there could be no poetry.

WHILE . . .

a university's financial problems may differ from those of a business concern, they are less different than is commonly believed. First, there must be an adequate amount of money, and, second, the funds must be handled in a business-like manner. Students, donors and sponsors of research have a right to expect efficient use of the money they give or invest. High-quality education is an expensive commodity that is invariably sold at a fraction of its price, and faculty and staff have a responsibility to make every dollar go as far as possible in the right direction.

University of Alberta Alumni Association
Mr. A. Markle, Secretary
University of Alberta

Dear Mr. Markle:

I was very pleased to be advised by the Students Awards Office of my being awarded an Alumni Association \$1,000 Intersession Bursary. I can acknowledge this award in humble gratitude because, not only will it allow me to devote concentrated attention to the completion of my thesis, but possibly also to carry out, and add to my main body of data, an experiment pursuant to it—an exciting prospect which would be impossible in the absence of absolute flexibility in the scheduling of my time.

I am looking forward to a busy summer followed, very likely, by more graduate studies at Queen's University in the fall. Thank you again.

Sincerely yours,
Nadia Hochachka

RESEARCH IN A UNIVERSITY . . .

is valuable not only for what it gives to society—and that is immense—but also for what it contributes to the institution's program of education. Actually it is a part of that program, providing rare experience for those who plan to pursue it as a life's work and rare insight for those who do not.

RESEARCH IS AN ADVENTURE . . .

The scholar who undertakes basic research is somewhat like the man who climbs mountains because they are there. Research is the way ahead, the little blurry light on the long dark path. It is man's unceasing quest for an understanding of himself, of his fellow man, of the world he lives in. And if man is to move forward, perhaps even preserve himself, he must learn more about himself and his environment. It is a university's privilege and responsibility to assist in that endeavor.

A UNIVERSITY . . .

may be large or small, sprawling or compact, its operation intricate or simple. But whatever it is and does, it must act in terms of the student. For he is the beginning and the end of a university. Whatever his virtues, his faults, his worth, he is the subject and the object of a university; he is the reason why.

THE PROGRAM . . .

of a university touches in some way on every want, need and struggle of man. It embraces the universe in all its dimensions—physical, moral and spiritual. It might seem then that such a program would be a more or less static thing, unchanging through the centuries. That, however, it must never become. Mutability is the law of life. Man's wants, needs and struggles are constantly modified. A university, with vigor, imagination and depth of vision, must meet that change; indeed, it must often predict it.

THE ULTIMATE . . .

continuing strength of a university rests with its alumni. Their association is ended only with death, and even then new generations of alumni provide the continuity that perpetuates a university. Its officers come and go, its faculties change, its programs are modified, and its buildings are replaced, but its alumni maintain a lifelong relationship to their university. They are keepers of the tradition, preferred stockholders of the enterprise, the mark of its accomplishment.

Secretary, Alumni Association
University of Alberta

Dear Sir:

Would you please express my thanks to any and all of those graduate members of your association who were responsible for providing me with an intersession bursary. The money will, of course, allow me to devote my full time to work on my thesis, and I shall do my best to ensure that the finished product will be worthy of their aid.

Yours sincerely,
W. Ray Ellenwood

University of Alberta Alumni Association
Mr. A. Markle, Secretary
University of Alberta

Dear Sir:

I should like to proffer my sincere thanks to the Alumni Association for making available the Intersessional Bursary that has been granted to me.

I am a graduate in the department of Political Economy, and my general field is Canadian Government. The bursary that has been provided will give me the time for research which otherwise would have to be spent on a summer job. I am married and have three children. Hence, I am sure you can understand my very real need and appreciation for this bursary.

Yours truly,
D. J. Murphy

Dr. Reuben B. Sandin, professor of chemistry (second from left) was one of six outstanding college chemistry teachers honored recently by the Manufacturing Chemists' Association. Other teachers honored, shown above with Howard S. Bunn, outgoing chairman of the Board of MCA (center), are (left to right): Dr. Gerrit Van Zyl, Hope College, Holland, Michigan; Dr. Harold A. Idle, University of New Hampshire, Durham; Dr. Carl M. Hill, Tennessee Agricultural and Industrial State University, Nashville; Dr. James Arthur Campbell, Harvey Mudd College, Claremont, California; and Dr. John Franklin Baxter, Jr., University of Florida, Gainesville.

In a major decision reached recently it was announced by the University that the Faculty of Arts and Science would be divided into two distinct entities. The decision to create the two new faculties was taken by the Board of Governors on the recommendation of the President and after consultation with the General Faculty Council.

Dean Douglas Smith, who has been Dean of the Faculty of Arts and Science, will continue as Dean of Arts, and **Dr. H. S. Armstrong**, now Dean of the Faculty of Arts and Science at McMaster University, has been appointed Dean of Science, effective July 1, 1962.

Administrative reorganization of the Faculty of Arts and Science has been made necessary by the dramatic growth of the student body of the University and by the rapid increase in the number and size of the departments in Arts and Science. The new faculties will each still be larger and more complex than any of the others at the University.

Although the two new faculties will be separate bodies administratively, they will work closer together in many matters, especially those relating to curriculum.

Dr. Herbert S. Armstrong, the new Dean of Science, brings to his new position a distinguished record of academic and administrative achievement. A native of Ontario, he studied at Victoria College, graduated with first class honours in honours geology and mineralogy from the University of Toronto and took his M.A. at Toronto and his Ph.D. in Economic Geology from the University of Chicago. He has taught at McMaster University since 1941 and has been professor of geology since 1950. He is a Fellow of the Royal Society (1951) and a member of its council and is a Fellow of the Royal Geographical Society of Canada. A member of several scientific societies, he is also active in numerous educational bodies, and has taken a leading role in cultural affairs in Hamilton.

A chapter of the newly-formed Canadian University Overseas Organization has been established on the campus. CUSO provides a liaison between foreign governments and

Canadian campuses, and arranges for students to serve on request in underdeveloped African and Asian countries. Other CUSO local coordinating committees or representatives have been established at 32 universities and colleges in all ten provinces.

Several major appointments and changes of academic duties have been recorded lately. **Dr. Harold Baker**, head of the division of secondary education, has been appointed Dean of the Faculty of Education at the University of Alberta, Calgary.

A member of the Faculty of Education staff in Edmonton since 1947, Dr. Baker has achieved an international reputation as an educational leader. He is the author of a number of books and has contributed to scholarly journals on both sides of the Atlantic. Since 1955 he has been chairman of the division of secondary education on the Edmonton campus.

The replacement for Dr. Baker is **Dr. Lawrence W. Downey**, new head of the division of secondary education. Born in Ceylon, Saskatchewan, Dr. Downey received his B.A. and academic teaching certificate from the University of British Columbia in 1946 and 1947 and after serving as a teacher and high school principal on the West Coast he was awarded a Ph.D. from the University of Chicago in 1959.

Dr. Marion Dixon Jenkinson, associate professor of elementary education and assistant director of educational research, has been elected to the Board of Directors of the International Reading Association.

The Association, founded in 1955, has approximately 19,000 members representing the United States and Canada and many of the European countries, also Australia, Iran, Turkey, and Africa. Dr. Jenkinson's term of office on the Board will be three years. She follows Miss D. M. Lampard, associate professor of elementary education, a director of the Association from 1956 to 1959. The University of Alberta has the unique distinction of being the only institution with two representatives elected directors of the International Association.

Dr. C. F. Bentley, Dean of the Faculty of Agriculture at the University of Alberta, has been named president-elect of the Agricultural Institute of Canada. The Institute is the national professional organization for graduates in agriculture and has a membership of 3,000.

Previous Alberta presidents of the A.I.C. were **Dr. Robert D. Sinclair**, former Dean of the Faculty of Agriculture, and **Dr. Robert Newton**, former President of the University.

Dr. Bentley is past-president of the Alberta Institute of Agrologists and the Canadian Society of Soil Science. Last year he received an outstanding alumni achievement award from the University of Minnesota.

Eleven members of the academic staff of the University of Alberta will be taking 12 months sabbatical leave next year. Three have received fellowships.

The Harlan Fiske Stone Fellowship valued at \$7,000 and sponsored by the Ford Foundation has been awarded to **Professor A. R. Thompson** of the Faculty of Law. Two Canada Council Fellowships valued at \$4,500 plus travelling expenses were awarded to **Dr. F. D. Blackley**, professor of history, and **Dr. William Wonders**, professor and head of the department of geography.

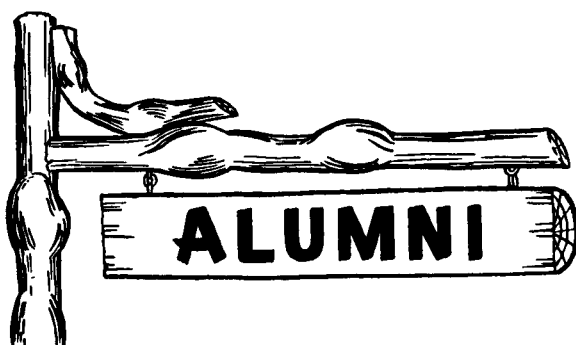

Other staff members granted sabbatical leave are **Dr. J. R. Nursall** of the department of zoology; **Dr. Saul Zalik**, associate professor of plant physiology and biochemistry; **Dr. J. S. Thompson**, assistant dean of medicine; **Dr. K. A. McMurchy** of the department of dental science; **Prof. F. V. McHardy**, head of the department of agricultural engineering; **Dr. W. C. Nash** of the department of pharmacology; **Prof. S. R. Sinclair**, head of the department of civil engineering and **Dr. R. S. MacArthur** of the division of educational psychology.

Six staff members of the University of Alberta and Calgary have been awarded short-term, post-doctoral research grants by the Canada Council.

The awards, valued at \$300 to \$1,000 are designed to assist professors to do research or writing during the summer months.

Receiving grants for work in the humanities were **P. L. H. Aubrey**, assistant professor of French in Edmonton, who will study French literature in Paris, and **J. F. Forrest**, assistant professor of English in Edmonton who will do research on puritan literature of the 17th Century at the British Museum.

In the social sciences classification, **Robert Craig Brown**, assistant professor of history at Calgary, will undertake research in Canadian-American history at the University of Birmingham and the British

'13

Earlier in the spring **C. P. Hotchkiss**, an original member of Convocation, was a visitor on the campus.

'15

Deputy Attorney-General H. J. Wilson has assumed the position of magistrate in the RCMP provincial police court in Edmonton. **John Hart '29**, Mr. Wilson's assistant, has moved into the deputy's position.

'23

The retirement of **W. G. Jewitt** as vice-president in charge of mines for the C. M. and S. Co. has been announced. Dr. Jewitt received an honorary LL.D. degree from the University in 1953.

'24

Mrs. G. Ross Gibson (nee Helen Beny) has donated to the Department of Political Economy the books of her late son **Robert '61** who was a graduate student in economics at the University prior to his untimely death in February. The collection consists of some 30 titles of contemporary standard works in the fields of economics and accounting.

Earl Clifford Stacey has retired after 38 years of service at the Dominion Experimental Farm at Beaverlodge. Following a holiday he will launch a new career as supervisor of contract forage seed produc-

tion in the Peace River district for Ontario Seed Cleaners and Dealers Ltd., of Toronto, engaged in a world-wide export trade.

'25

At a recent Third National Farm and Business Forum held in Winnipeg several Alberta graduates chaired various committees. Among these were **W. G. Malaher**, **T. P. Devlin** and **Ken C. Stewart '54**.

Dr. C. K. Johns, director of dairy research, Canada Department of Agriculture, addressed an Alberta convention recently on radioactive fallout.

'28

D. A. Hansen, Calgary, has been appointed vice-president of the Canadian Electrical Association.

Max H. Wershof, Canadian representative to the United Nations in Geneva, has been appointed assistant undersecretary of state for external affairs.

'34

The British air ministry announced recently the appointment of **Air-Vice Marshal Sidney Richard Carlyle Nelson** as director general of the Royal Air Force Medical Services.

Alberta-educated **Arthur C. Twomey** has penetrated the Mackenzie Delta area by snow shoe, dog sled and Indian canoe. He toured remote parts of East Africa by

jeep and spent five months sleeping under canvas.

Recently Dr. Twomey explored the Florida everglades, gathering film for the full-length travelogue on Florida which he presented in the World Adventure Tours series across Canada.

His home is now in Pittsburgh where he is curator of ornithology at Carnegie Museum and director of the education division at Carnegie Institute.

'35

R. E. Byron, for ten years a director of vocational education for Alberta, has been appointed director of technical assistance in Canada's external aid office, a branch of the external affairs department, in Ottawa.

Bethumne Vanderburg is now associate professor of mathematics at Los Angeles State College.

When the British Columbia Assize Court opened its first sitting of 1962 there was a lady in court for the prosecution.

Norma Christie is the first woman barrister appointed by the attorney-general's department to assist the Crown in prosecutions. Robed in the traditional black gown of the court room lawyer and with a stylish pixie hairdo, Miss Christie took her place beside Crown Prosecutor Victor Dryer to assist him.

'37

Dr. Max T. Rogers, professor and acting head of chemistry at Michigan State University, has been awarded a National Science Foundation Fellowship. Dr. Rogers will do research on nuclear magnetic resonance spectroscopy in collaboration with physicists at the National Physical Laboratory, London.

In her election as vice-president of the American College of Obstetricians and Gynecologists at a recent meeting in Chicago, **Dr. Margaret Hutton** becomes the first woman elected to any office of the College. She is chairman of the Alberta section, recently included as a division of the College, and is the first chairman of the division to which she was elected by her professional associates in Alberta.

'38

Dr. J. Robert Weir, president of the Agricultural Institute of Canada, recently addressed a meeting of the Edmonton branch of the Institute.

'39

Hugh McCall, Stony Plain, is the new president of the Alberta Teachers' Association.

'40

Dr. William N. McBain, assistant professor of psychology at San Jose State College, California, has received a \$30,000

Museum. Another Calgarian, **Robert Alexander Shields**, assistant professor of history, will do research in history in London.

Lewis Hertzman, assistant professor of history in Edmonton, will study the history of Germany in Vienna, Coblenz, and London.

Thomas Lawrence Powrie, professor of economics at the University in Edmonton, will do research in economics at the Institute for Economic Research at Queen's University, Kingston, Ontario.

A new four-year course in recreation leading to a B.A. degree in recreation has been announced by the School of Physical Education. The only one of its kind in the West, the new course will graduate stu-

dents capable of becoming superintendents and directors of recreation programs in centres throughout Western Canada.

In a recent letter University staff were notified that **Scotty Maclean**, after 33 years of service, would be leaving the employ of the University on the advice and recommendation of his physician.

A paragraph in the note read, "Scotty has made a very substantial contribution to individual members of the staff, to departments and to the University as a whole during his many years of service and I am sure you will agree that his special characteristics and talents will be impossible to replace."

The New Trail heartily concurs.

grant from the U.S. Department of Health, Education and Welfare to study monotony as an accident predictor.

'41

S. V. Legg was recently named an Edmonton City Police court magistrate.

The Alumni Office was favored recently with a visit from **R. W. (Bert) Ross**, now with Canada Creosoting Company, Montreal.

'42

Dr. Patrick Blair Rose has been appointed assistant director of medical services and emergency planning officer for the Alberta government.

'43

Gerald A. Larue, University of Southern California, recently received a \$1,000 award for excellence in teaching based on a vote by graduating students.

High River author **W. O. Mitchell** has been named 1962 winner of the Leacock medal for humor for his collected edition of *Jake and the Kid* stories, which was a leading seller among Canadian books published last year.

The medal commemorates the late Stephen Leacock, internationally famed humorist whose *Sunshine Sketches of a Little Town* fictionalized his home town of Orillia, Ontario.

'44

Stanford University in California recently conferred a Doctor of Education degree on **John C. Dubeta**.

'46

Robert McClary, assistant and planning operations engineer for the Edmonton electric light and power department, has been named to study power transmission from the proposed coal-operated power plant in the Genesee area, 30 miles southwest of Edmonton.

Murray E. Stewart has been elected president of the Alcoholism Foundation of Alberta.

Principal of Camrose Lutheran College high school, **Gulbrand 'Bert' Loken**, has been elected president of the college for a six-year term.

'48

A tall, quiet-spoken Canadian holds a key job in international journalism, reporting, as he puts it, "effects of history's biggest social experiment on one of the world's oldest cultures."

Clare McDermott, Reuters correspondent in Peking, is the only permanently resident Western reporter in the Chinese capital.

ALUMNI AWARD TO SENATOR

Senator Donald Cameron, Director of the Banff School of Fine Arts, was awarded the meritorious U. of A. Alumni Golden Jubilee Award at Spring Convocation. The presentation was made by Dr. D. R. Stanley, President of the General Alumni Association.

The Award, a framed citation, accompanied by a gilded tray, was initiated in 1958 and is placed annually by the Alumni Association with someone, not necessarily an alumnus of the University, who has contributed notably to the welfare of the institution, either directly or indirectly.

Previous Award winners were Dr. G. Fred McNally, Geoffrey B. Taylor, Maimie S. Simpson and Dr. W. H. Swift.

A man of many abilities and facets, Senator Cameron obtained a Bachelor of Science degree in Agriculture from the University of Alberta in 1930 and a Master of Science degree in 1935. In 1936 he was named director of the Banff School of Fine Arts and in 1938 became director of U. of A. extension. In 1954 he was appointed to the Senate and in 1957 was selected to head the Royal Commission which investigated Alberta educational systems.

In recognition of his outstanding contributions in the field of continuing education the University of British Columbia conferred an honorary Doctor of Laws degree at its spring convocation in 1959. The same year he was elected head of the Canadian Association for Adult Education.

The 33-year-old native of Edmonton sees few Westerners in Peking and even fewer Canadians. Apart from a Chinese driver and two interpreters supplied by the state, his main contacts are with Chinese officialdom.

His life is subject to the professional and personal restrictions placed on all foreigners by the Communist authorities.

In a city of nearly 7,000,000, of whom probably only 1,000 or 2,000 are foreigners, McDermott finds he cannot walk down a street without attracting attention, however friendly it may be.

'49

Don Duff is now president of Duff, Abbott and Associates Ltd., Halifax, development consultants.

'50

Theodore E. Thomas has been awarded a Rockefeller Doctoral Fellowship in religion which will take him to Columbia University and Union Theological Seminary for study.

'51

Dr. Walter Zacherl has been elected president of the Alberta division of the Canadian Public Health Association.

Dr. Loran F. Pilling, has been appointed to the staff of the Mayo Clinic, Rochester, Minnesota, as a consultant in psychiatry.

George A. McNeill has joined the technical service department of Monsanto Chemical Company's Hydrocarbons Division Chocolate Bayou refinery, near Alvin, Texas.

H. R. Milner has retired as chairman of Canadian Western Natural Gas Company Limited in Calgary and Northwestern Utilities Limited, Edmonton. **B. F. Wilson '43**, formerly executive vice-president of Canadian Western and Northwestern, has been appointed president and chief executive officer.

'54

Dr. David Osoba has been awarded a \$4,500 fellowship for advanced study in the methods of cancer research and treatment in London, England.

'55

Maxwell W. Nimeck has received his Ph.D. in microbiology from the University of Texas.

A Calgary dentist has decided to abandon his practice to devote a lifetime of service in foreign missions of the United Church of Canada.

Dr. Donald F. Green, his wife (nee Gladys E. Gehman '54) and two children will move to Korea for their first foreign appointment this fall.

Dr. Green's decision was not made lightly. "We started thinking about this two years ago." Largely, he declared, the influence of friends and his church—Pleasant Heights—and a conviction that Christianity's main points are "concern and compassion for others and a desire to help others" contributed to his decision to become a medical missionary.

James A. Sherbaniuk has been awarded two fellowships totalling \$2,450 for graduate work at the University of Washington in Seattle. Mr. Sherbaniuk will be studying for a doctorate in economics and busi-

ness administration on the grants made available by the Ford Foundation and the Central Mortgage and Housing Corporation of Ottawa.

'56

Garth Milvain has been appointed sales representative for Irving Wire Products Ltd.

Four post-graduate students were recently awarded fellowships in the humanities, fine arts and social sciences by the Canada Council. They were **Lorne M. Kendall**, **Mrs. F. D. Clandfield** (nee Donna

A school group with a brilliant record—Crescent Heights High School's Mixed Chorus—were featured at Vancouver during the convention of the Canadian Music Educators' in April.

For three days the Calgary chorus, 82 strong, held the centre of the stage, appearing at the Vancouver Band Shell before the convention and as a demonstration group at a choral workshop.

Founded eight years ago by **Lloyd R. Erickson** who has been the director of music at the North Hill school for nine terms, personnel of the chorus has increased from 30 to 82 through the years and it has amassed an impressive string of awards.

Joseph (Nick) Fry Jr. has been awarded a \$10,000 Alfred P. Sloan fellowship to enable him to study for a doctorate in business administration at Stanford University.

Fred C. Jorgenson, head of the English department and public relations officer at the Southern Alberta Institute of Technology, has been named vice-principal of the Institute.

Promising young actors, **Hutchison Shandro** and **Kenneth Welsh** '62 each received a \$250 scholarship recently from the Canadian Women's Theatre Guild.

Pvt. Colin F. Campbell, boating safety inspector from New York, is taking advantage of his assignment to Fort Carson and the 5th Infantry Division (Mechanized) to tackle a new skill—climbing—with Pikes Peak as his goal. Recently he tackled Cheyenne Mountain's 9,000-foot bulk which dominates the Carson panorama with other Red Devils from 5th Administration Company.

'59

Leonard Bauer, district agriculturist at High Prairie, has been appointed agricultural economist in the farm economics branch of the provincial agriculture department.

The IODE War Memorial Overseas Scholarship for 1962-63 has been awarded to **Lawrence Patrick Burns**. Mr. Burns is now attending King's College at Cambridge University, England.

'60

Dr. C. H. Bigland, assistant director, laboratory services division, Alberta veterinary services branch, Edmonton, has accepted a position as associate research veterinarian with the faculty of veterinary medicine, University of California.

'61

Cary Nathan Davids has been awarded an Imperial Oil Graduate Research Fellow-

ship valued at \$7,500. Mr. Davids will continue his study in the fall at the California Institute of Technology in Pasadena, California. He will take three years in his study leading to a doctorate in physics.

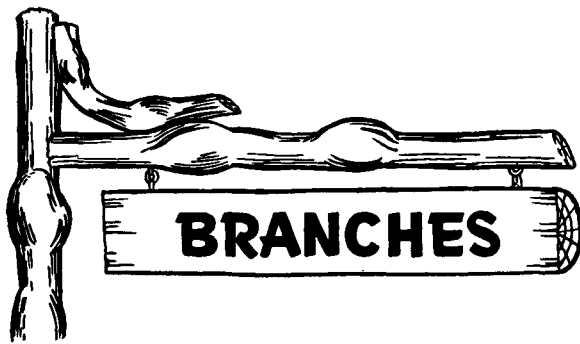

Sandra Frances Sellens, Calgary, has been awarded a \$1,500 Canada Council Scholarship tenable at any Canadian university for studies leading to her master's degree.

DEATHS

John Joseph Tighe '18—former solicitor and private secretary to the late John Burns.
William J. Dean '28—former pioneering bush pilot and mining consultant.
Dr. Carlton D. Taylor '31—well-known Edmonton Physician.
Paul H. Steele '34—an Alberta school teacher for 30 years.
Walter Maybank '36—general manager of Northgate Exploration Ltd., Toronto.
Mrs. R. E. Lavender (nee **Joan H. Mayhood**) '37—graduate in Arts.
Carl Robert (Bob) Gibson '61—brilliant Medicine Hat alumnus.
Dr. John J. Ower—distinguished member of the medical profession and Dean of Medicine from 1945 to 1948.
Dr. W. H. Alexander—first academic appointee to the University of Alberta staff in 1908 and Dean of the Faculty of Arts and Science in 1936.

Vegreville

The annual Students' Varsity Night was held in May at which sixteen students were present. In addition to special speakers from the University, there were several alumni in attendance. The meeting was considered a success.

Calgary

The Calgary branch had a relatively busy year. Six executive meetings were held and the main project undertaken was the design and construction of a Convocation chair to be presented by the Calgary branch to the University of Alberta, Calgary, for Fall Convocation, 1962.

A member of the executive sat in on preliminary discussions with other groups who are interested in the possibility of obtaining a non-commercial Hi-Fi, F.M. radio station connected with the University of Alberta, Calgary. Long range planning of this committee envisages an education TV channel.

Another member of the executive was instrumental in having the University Mixed Chorus stop in Calgary for a performance in May.

Nurses' Alumnae

There were nine meetings held at the nurses residences with an average attendance of 30 members.

Projects for the year included catering for two graduation receptions following exercises at the Jubilee Auditorium; an alumnae scholarship of \$250 placed with Miss Margaret McDonald for study; an alumnae prize of \$25 to intermediate nurse, Miss Lois Kvisle; help at four blood donor clinic sessions; newsletter to all graduates; Christmas gifts to our nurse missionaries; presentation of scissors and memberships to graduates of two classes.

Victoria

Two meetings have been held in the past year. The first was a picnic held at the summer home of Miss Liliias Milne at Prospect Lake in August.

The second, held in March, took the form of a social evening at the home of Dr. and Mrs. Turner. Approximately 40 alumni gathered to renew old acquaintances and to

share in an evening of happy fellowship. Mrs. Mae Myhre, last year's delegate to the annual alumni meeting in Calgary, gave a report of that meeting. She included the University's future expansion program which was of interest to all.

Medical Alumni

It is a pleasure to report that the Medical Alumni Association is in an excellent state of health. The clinical signs and symptoms, as outlined below, indicate a most favorable prognosis.

Last June our Association sponsored a breakfast for medical graduands and their wives, on Convocation Day. This was so well received that we have again reserved the Mayfair Golf and Country Club to welcome our new members. And again this year, one of the highlights at Convocation was the placing of the John Scott Honor Award. This recognition of leadership potential and scholarship in a graduating student is a tangible expression on the part of the medical alumni, not only for an esteemed teacher, but for their medical school.

The Medical Alumni banquet, held annually in conjunction with the Canadian Medical Association (Alberta) meeting, continues to be a worthwhile and popular affair. The silver anniversary class is guest of honor each year. Our Association assists the class with its reunion arrangements, and provides silver trays as mementos. Dr. Walter Johns was an able guest speaker for the occasion in Edmonton last September. Plans are underway for the 1962 banquet in Calgary.

During October our Association made a much-appreciated contribution towards the medical float in the Varsity Homecoming Parade. Secretarial assistance was given to the class of 1941, who staged a reunion and enlarged its own useful Loan Fund for medical undergraduates who encounter personal financial emergencies.

The Medical Alumni Association Loan Fund should, and will be, reviewed. This

The alumni branch reports included on this and subsequent pages were those submitted by branch representatives at the 23rd annual council meeting of the General Alumni Association.

was established in 1956 and was intended to assist second-year internes who were preparing for general practice. Lack of applications recently, probably results from improved conditions for graduate training.

The Medical Alumni Association is at present playing a substantial part in establishing a Memorial Fund to the late Dr. John James Ower, who was professor of pathology for 32 years, and the second Dean of Medicine. It is hoped that a gold medal and a substantial prize will be set up, in perpetuity, in his honor.

The writer is pleased to report a paid-up membership of more than 220 medical alumni, probably the largest in our history.

V.C.F.

Serving to spearhead the activities of the past year were the following members: W. Paetkau, president; L. C. Mix, vice-president; Miss Irene Holland, secretary; Mrs. Gwen Mabbitt, membership secretary; E. Afganis, treasurer. Assisting in the capacity of an advisor was Quentin Mix.

It is difficult to assess the tangible results at this stage, but a few highlights will serve to point out the direction in which the V.C.F. alumni branch has been moving in its first year.

It was largely the work of L. C. Mix that initiated the development of the V.C.F. Alumni. With the approval and assistance of the committee he drew up the present constitution, formulated a rather inclusive report and upon the invitation of the G.A.A. served as our representative to the annual general meeting held in Calgary last April. Since that time the V.C.F. alumni work has been carried on officially.

In September alumni were invited to participate in a weekend at Pioneer Ranch Camp in conjunction with Campus in the Foothills. It was here that Dennis Clark, inter-varsity stewardship secretary, challenged some twenty alumni with the necessity of being Christian workers in strategic places.

In the fall Wilber Sutherland, Canada General Secretary for the I.V.C.F., spoke to a group of about 30 on the topic "What is the Role of a University Christian Graduate Association?"

The organization has 21 full members and 16 associate members. Twenty others have written of their interest. The mailing list includes some 175 names.

Vancouver

Since the last general meeting of the Alumni Association, the Vancouver branch of the association has continued active and has endeavored to develop enthusiasm and interest among the resident alumni.

As reported at the Calgary general meeting, the 1961 annual meeting was honored by the presence of Dr. Malcolm Taylor,

Principal, University of Alberta, Calgary. The inspiration which was brought to our meeting through the presence of Dr. Taylor and his timely address, continues to infuse Vancouver alumni. During the fall of 1961, the executive of the Vancouver branch were honored again by the presence of Dr. Taylor at an evening meeting of the executive.

In October, 1961, the annual football game in Vancouver between U. of A. Golden Bears and U.B.C. Thunderbirds was held, and competition centered around the "Rainbow Trophy" donated by the Vancouver branch in 1960. Sad to relate, U.B.C. won the trophy which was presented to their captain at the end of the game. In October, 1962, the "rubber" game for the trophy will be held in Vancouver. Your enthusiastic Vancouver members will be out again "en masse" to cheer the Golden Bears on.

Following the football game, the annual fall reception was held in the officers mess, U.B.C. Armouries. The coaching staff of the Golden Bears attended as honored guests.

It is the opinion of the Vancouver branch that sponsorship of a block of seats at the annual football game in Vancouver between U. of A. and U.B.C., together with the reception held following the game, do much to spark the camaraderie between our Vancouver members.

In March our annual meeting was held at the Vancouver Lawn Tennis and Badminton Club. We were honoured to have as our special guest speaker the 1961-62 president of the General Association, Mr. Haughton Thomson. Some seventy persons attended the meeting, and were treated to a half hour of musical entertainment provided by the executive members.

During the 1962-63 year the Vancouver branch will continue to keep alive in our city a genuine interest in the affairs of the University. Its growth and its accomplishments are watched with interest by each of us.

Ottawa

During the past few years it has been the branch's custom to hold its annual meeting in the form of a buffet supper in order to allow new and old friends to meet before and after the repast, which is usually followed by a speaker. The meeting is generally timed to coincide with a visit from someone from Edmonton. As this was not possible this year, the branch was most fortunate in having one of our better known members, in the person of Senator Donald Cameron, Director of the Banff School of Fine Arts, as its guest speaker at its annual meeting held in the Le Cercle Universitaire.

Senator Cameron told us about the de-

velopment and organization of the school and showed a film entitled "Campus in the Clouds". The talk and film were very interesting and was followed by a question period. Some 74 members and guests were present.

Our branch was ably represented by vice-president Mrs. Ivan Coram and councillor Don Dickson in assisting with arrangements for the University Ball, sponsored by the University Alumni Council of Ottawa. The Ball was held in the Chateau Laurier in February.

The executive is well pleased with arrangements to send notices of branch events to members by way of the General Alumni Association.

The number of our membership has increased slightly during the past year. The branch's 1961 membership stood at 284. The present membership stands at 300.

Toronto

Four reunions were held during the past year, with an average attendance of 50 people at each affair.

A Spring Tea was held in May at the Library Lounge of the Household Science Building of the University of Toronto. At that time, the officers for the year 1961-62

were elected.

September saw a "return to school" on the part of these members—all were invited to the home of Mr. and Mrs. Mike Bevan who opened their "converted schoolhouse" home to the group. The "family" outing proved to be one of our most enthusiastic ventures, and many who missed it expressed genuine regret at having played "hooky". From the sand-pile crowd, to the "Golf-Putt" and "Horseshoe Tournament" participants, a good time was had by all! Dr. Cooper won the Horseshoe trophy, and the "Wembley Cup" for the Golf-Putts is in the temporary custody of Floyd Buckles.

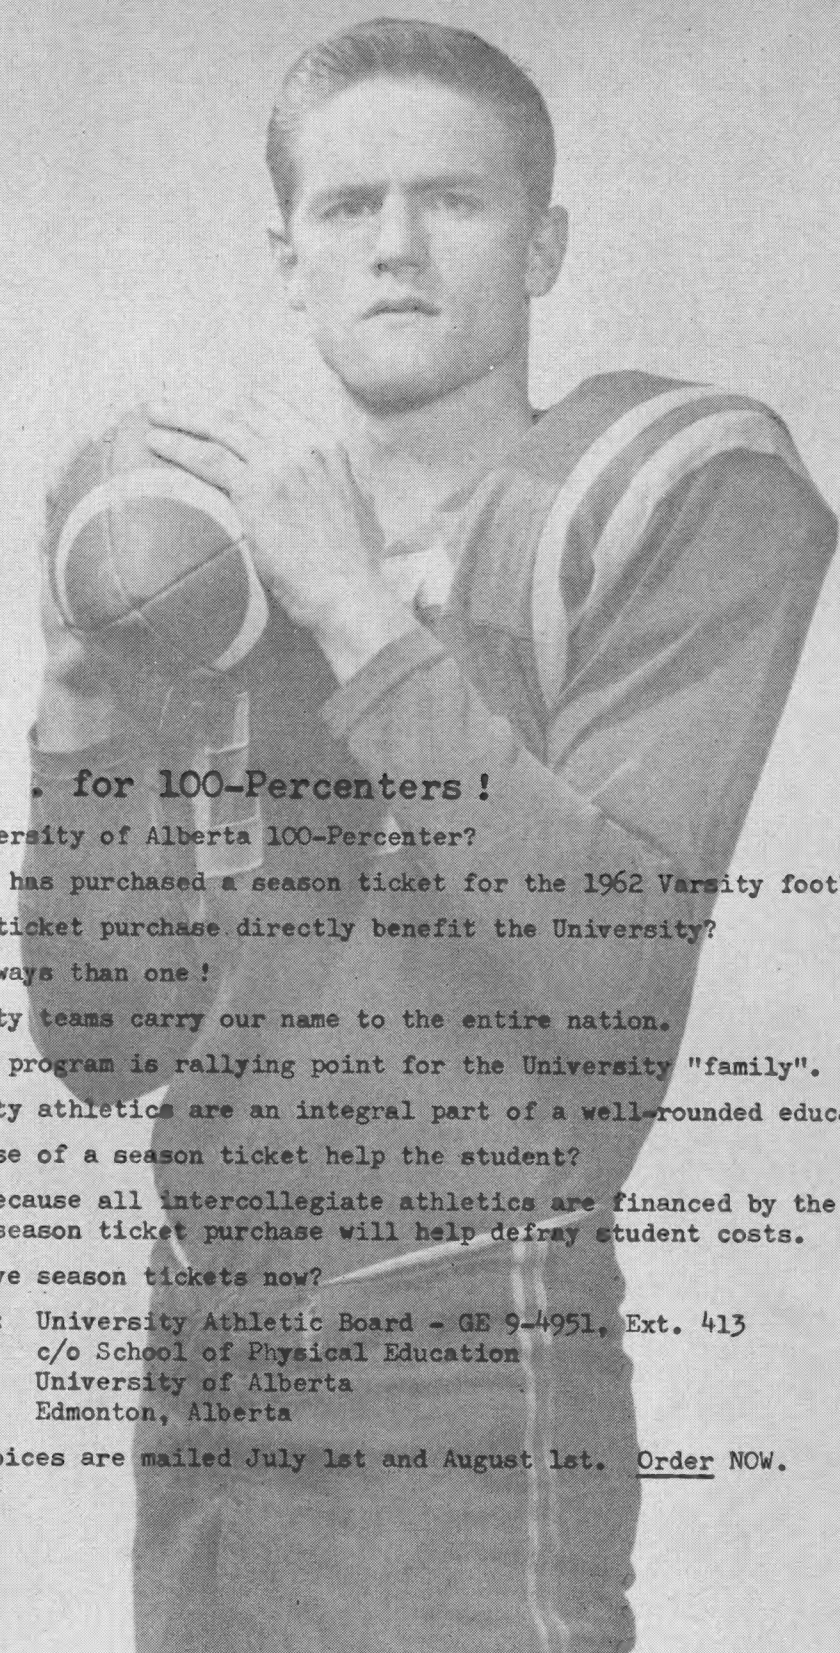

In November an alumni dinner was held at the "House on the Humber". The Hon. R. C. Michener, Speaker of the House of Commons, Ottawa, a distinguished alumnus, spoke on "Unparliamentary Language". Later, dancing was enjoyed and all in attendance declared it to be a most enjoyable event.

The Toronto branch joined the alumni associations of the other Western Universities in March to sponsor the annual dance at the Royal York Hotel. Our attendance was noticeably low, and the Saskatchewan and U.B.C. alumni were in the majority.

ALUMNI CLASS REPRESENTATIVES

Each spring the G.A.A. plays host to a new group of alumni class representatives chosen from the graduating classes in each school and faculty on the campus. Seen in the north room of the Cafeteria after dinner along with members of the resident alumni executive of the G.A.A. are senior students elected by their classmates to represent them in perpetuity. Seated, left, Irma Strifler, arts and science; Betty Davies, household economics; H. G. Thomson, Alumni executive; Marilyn Alexander, medical laboratory science; Marilyn Anderson, member of senior class committee; Marlene Stenvig, education. Standing left to right, Dave Shefsky, civil engineering; Barry Schloss, chairman of senior class committee; Dr. D. R. Stanley, Alumni executive; Colin Lang, mining and metallurgy; S. Fialkow, member of senior class committee; Bryon Clark, commerce; A. G. Markle, Alumni Secretary.

GRID QUIZ . . . for 100-Percenter !

Q - What is a University of Alberta 100-Percenter?

A - A graduate who has purchased a season ticket for the 1962 Varsity football season.

Q - Does a season-ticket purchase directly benefit the University?

A - Yes...in more ways than one !

1. University teams carry our name to the entire nation.
2. Athletic program is rallying point for the University "family".
3. University athletics are an integral part of a well-rounded education.

Q - Does my purchase of a season ticket help the student?

A - Definitely...because all intercollegiate athletics are financed by the student body and your season ticket purchase will help defray student costs.

Q - How do I reserve season tickets now?

A - Phone or write: University Athletic Board - GE 9-4951, Ext. 413
c/o School of Physical Education
University of Alberta
Edmonton, Alberta

P.S. -- Ticket invoices are mailed July 1st and August 1st. Order NOW.
